RELEVANT EXPERIENCE

Bloomberg

New York, NY

Product Analyst

August 2026 - Present

- Developing expertise in Bloomberg's financial-data and analytics platform by mapping investment workflows and user needs to Terminal functions across asset classes
- Building a foundation in feature education, client onboarding, product rollout, and workflow improvement across Analytics and Sales

Sales and Analytics Intern

May 2025 - August 2025

- Supported 50+ institutional clients and helped increase adoption of targeted Terminal functions and workflows by 15% by connecting user needs to underused capabilities
- Resolved 30+ workflow questions weekly with 98% accuracy, converting complex product functionality into actionable user guidance
- Analyzed feature usage across client accounts to uncover \$250K+ in expansion potential and shape data-driven outreach around unmet workflow needs

Flaire (Acquired by Pangea)

Atlanta, GA

Product Management Intern

August 2024 - December 2024

- Converted insights from 100+ traveler reviews into prioritized improvements for 5+ social-travel features; user-satisfaction scores rose 20%
- Segmented product performance across 4 customer cohorts to identify retention opportunities; target-cohort retention rose 15%
- Improved business-intelligence dashboards and reporting workflows, cutting recurring reporting time by 30% and accelerating product reviews
- Coordinated 3 cross-functional teams to prioritize 50+ backlog items against user impact, feasibility, and roadmap goals

Sponsors for Educational Opportunity (SEO)

New York, NY

Software Engineer Intern

May 2024 - August 2024

- Built three user-facing prototypes spanning machine learning, market analysis, scheduling, and notes, moving each concept from API and database design to a functional interface
- Integrated OpenAI, Binance, Google Calendar, and Google Cloud services into functional product workflows
- Developed full-stack functionality across databases, APIs, and front-end interfaces through iterative project delivery
- Presented project work and incorporated technical feedback from engineers at Goldman Sachs, BlackRock, and Apple

OTHER EXPERIENCE

The Artemis Fund

Houston, TX

Venture Capital Intern

August 2025 - December 2025

- Evaluated early-stage products and business models through market sizing, competitive analysis, financial review, and risk assessment
- Synthesized product, market, and operating insights into investment memos and pitch materials for internal decision-making
- Mapped competitive landscapes and industry trends to identify differentiated products and emerging customer needs that could inform product positioning
- Built founder and investor relationships across startup ecosystems to strengthen top-of-funnel deal flow

Vector Group Holdings

Atlanta, GA

Private Equity Intern

August 2023 - December 2023

- Translated healthcare-technology research into structured briefs comparing markets and acquisition opportunities
- Reviewed company financials and legal materials to support target screening, valuation modeling, and diligence
- Organized target research into comparable criteria to make the acquisition pipeline easier to evaluate
